Severe Weather Outlook Friday, May 03, 2019

Hazardous Weather

Storms Likely this Morning

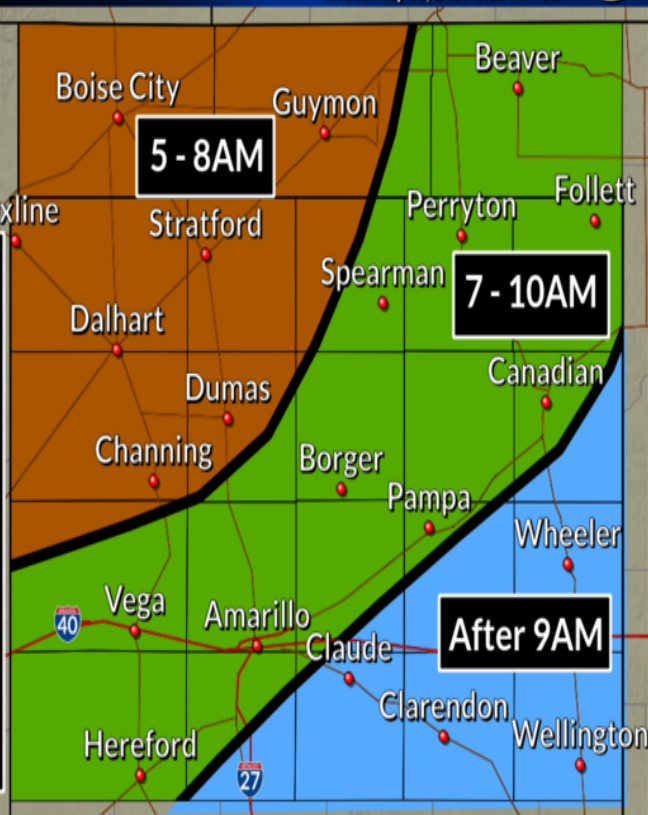

Weather Forecast Office
Amarillo, TX
Issued May 03, 2019 3:18 AM CDT

Approximate Timing Shown

- Not everyone will get a storm:
northern, eastern Panhandles more likely to see a storm than southwestern Panhandles

- Lightning, small hail main hazards with these storms

f t NWSAmarillo

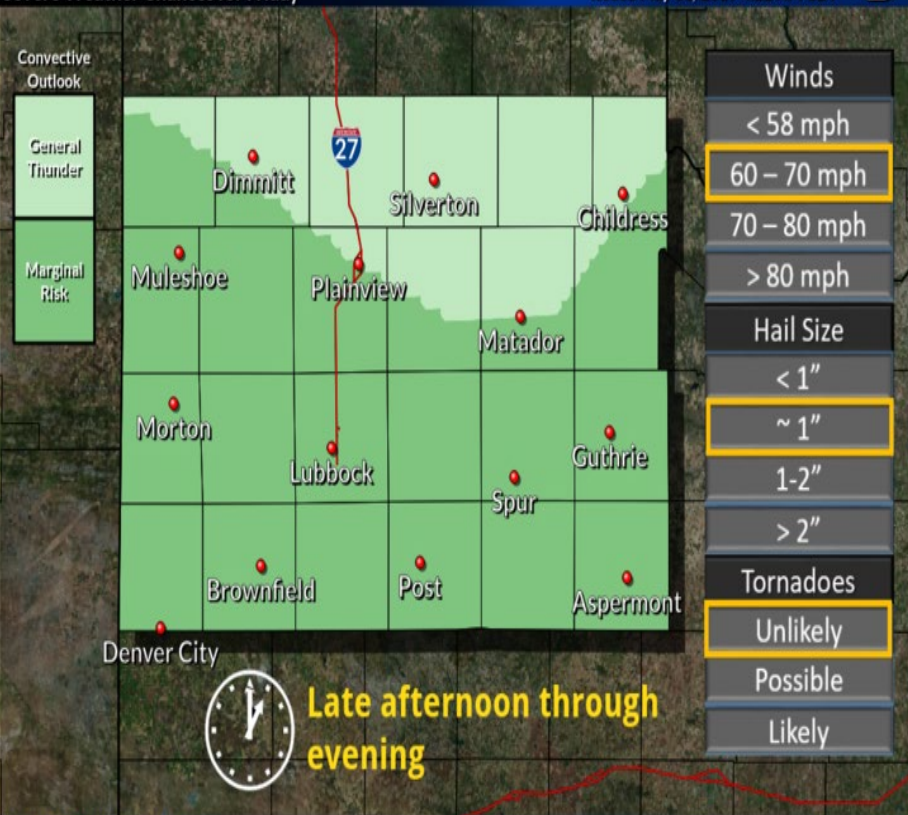

weather.gov/ama

Showers and storms will likely develop over the northwestern Panhandles early this morning and sweep southeastward, exiting the Panhandles by the early afternoon hours. A few of the storms could be strong, with lightning and small hail the most likely hazards. Not everyone will get a storm - the northern and eastern Panhandles are more likely than the southwestern Panhandles to receive rain.

Severe Weather Outlook

Severe Weather Chances for Friday

Weather Forecast Office
Lubbock, TX
Issued May 03, 2019 4:22 AM CDT

f t NWSLubbock

weather.gov/lub

A marginal risk of severe storms is possible today especially over the southwestern South Plains.

Hazardous Weather

Rain Chances Continue Today

Showers and Storms Redeveloping this Afternoon & Evening

Weather Forecast Office
San Angelo, TX

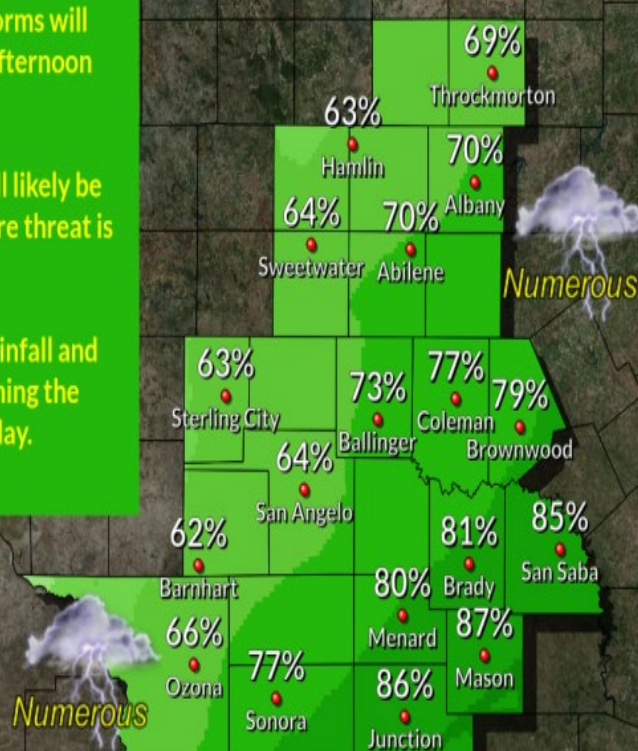

Issued May 03, 2019 5:17 AM CDT

Showers and Storms will redevelop this afternoon and evening

Some storms will likely be strong, but severe threat is limited.

Locally heavy rainfall and dangerous lightning the main threats today.

[f](#) [t](#) [v](#) NWSSanAngelo

weather.gov/sjt

Numerous showers and storms will redevelop for the afternoon and evening hours across West Central Texas. The threat of severe weather is more limited today, with the main concerns being locally heavy rainfall and dangerous lightning.

Flash Flood Watch

Continues through Saturday morning for North Texas

Weather Forecast Office
Fort Worth, TX

Issued May 03, 2019 6:44 AM CDT

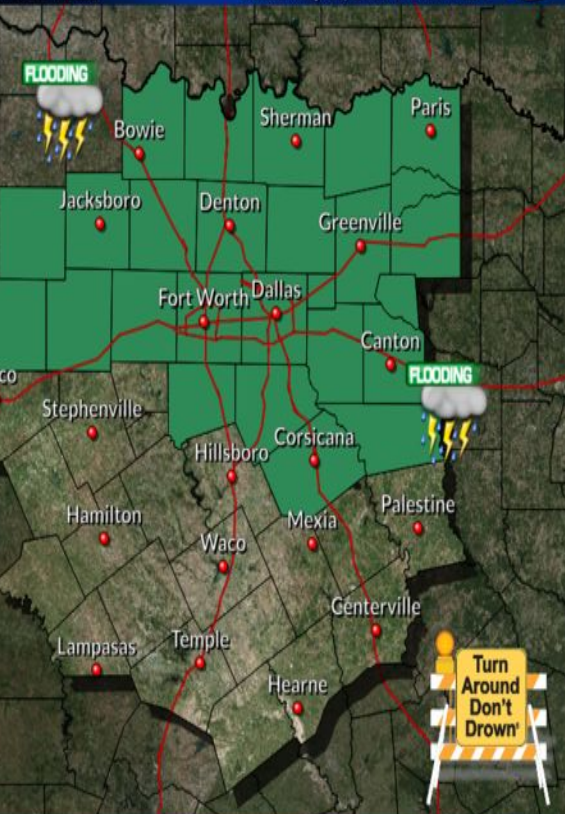

A Flash Flood Watch continues for the indicated areas through 7:00 a.m. Saturday morning.

Much of North Texas has received two to five inches of rain during the past few days.

An additional one to two inches of rain will be possible today and tonight.

Additional heavy rainfall will only act to aggravate any ongoing flooding, and with soils already saturated, new flooding is possible.

Do not drive where water of unknown depth covers the roadway, and stay away from creeks and streams, as rapid rises may occur if additional heavy rain falls.

[f](#) [t](#) [v](#) NWSFort Worth

weather.gov/fortworth

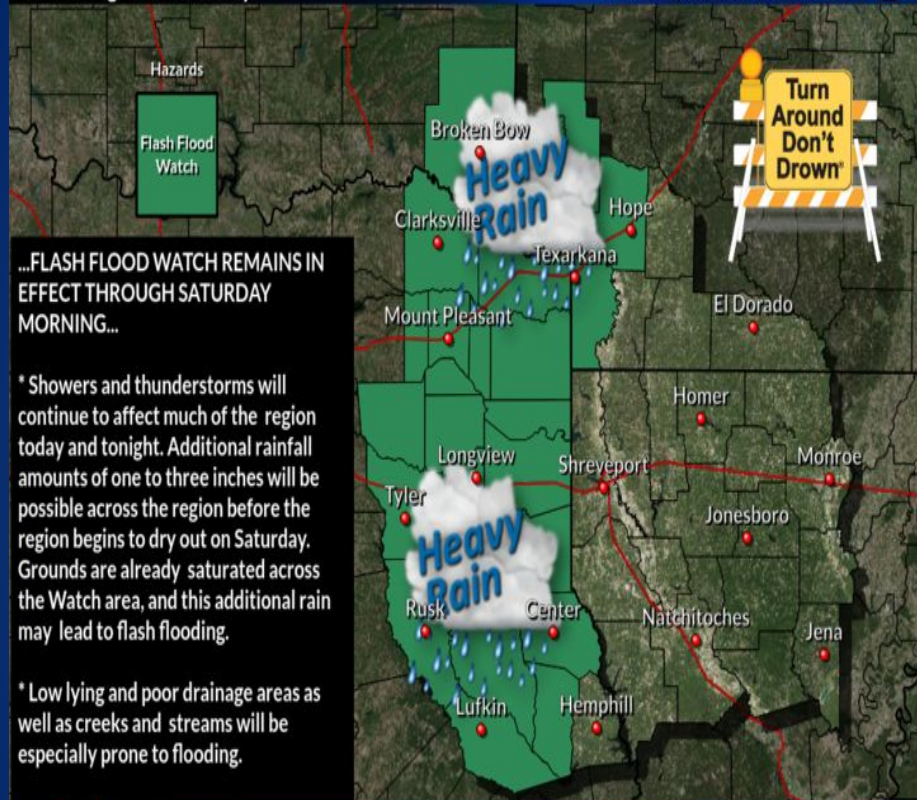

A Flash Flood Watch continues for much of North Texas through 7:00 a.m. Saturday morning. North Texas has received two to five inches of rain during the past few days, and an additional one to two inches of rain will be possible today and tonight. Additional heavy rainfall will act to aggravate any ongoing flooding, and with soils already saturated, new flooding will be possible. Do not drive where water of unknown depth covers the road, and stay away from creeks and streams as rapid rises may occur if additional heavy rain falls.

Hazardous Weather

Flash Flood Watch Continues

Valid through 7 am Saturday

Weather Forecast Office
Shreveport, LA
Issued May 03, 2019 4:41 AM CDT

f t v NWSShreveport

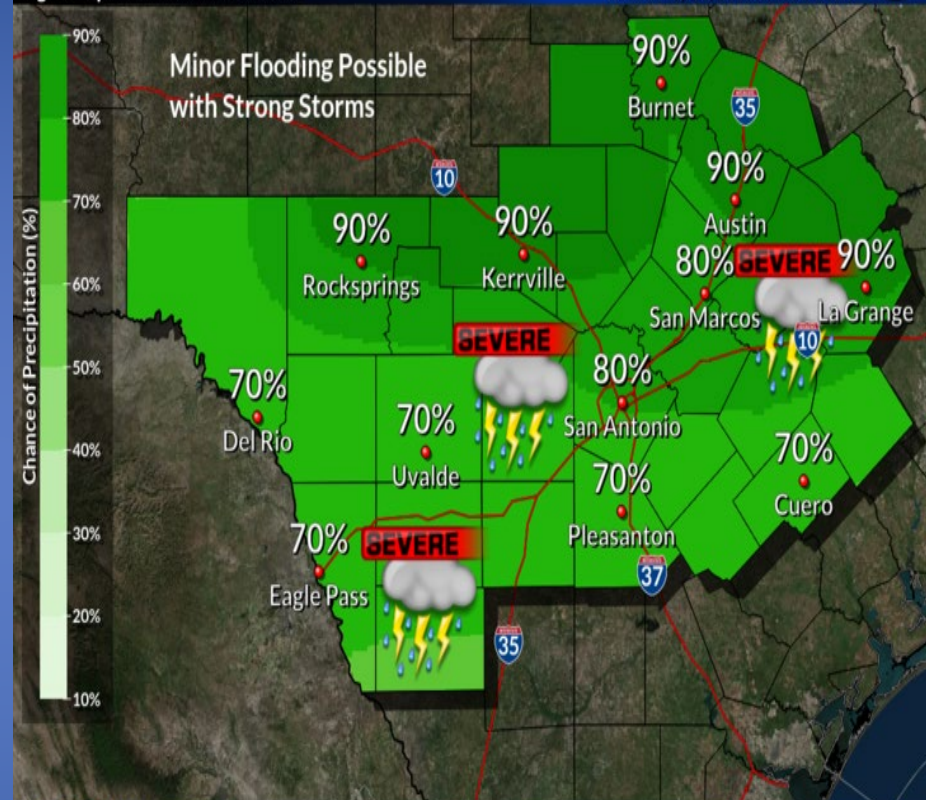

weather.gov/shv

A Flash Flood Watch remains in effect until 7 AM Saturday. Additional showers and thunderstorms will affect the area Today through Tonight with additional rainfall amounts of one to three inches possible.

Severe Thunderstorms Possible

High Temperatures Below Normal

Weather Forecast Office
Austin/San Antonio, TX
Issued May 03, 2019 3:46 AM CDT

f t v NWSSanAntonio

weather.gov/ewx

There is a slight risk of severe storms for most of South Central Texas this afternoon and evening. Large hail and damaging winds will be the main threats, but isolated tornadoes will also be possible. High temperatures will be below normal ranging from the lower 70s to the middle 80s.

Hazardous Weather

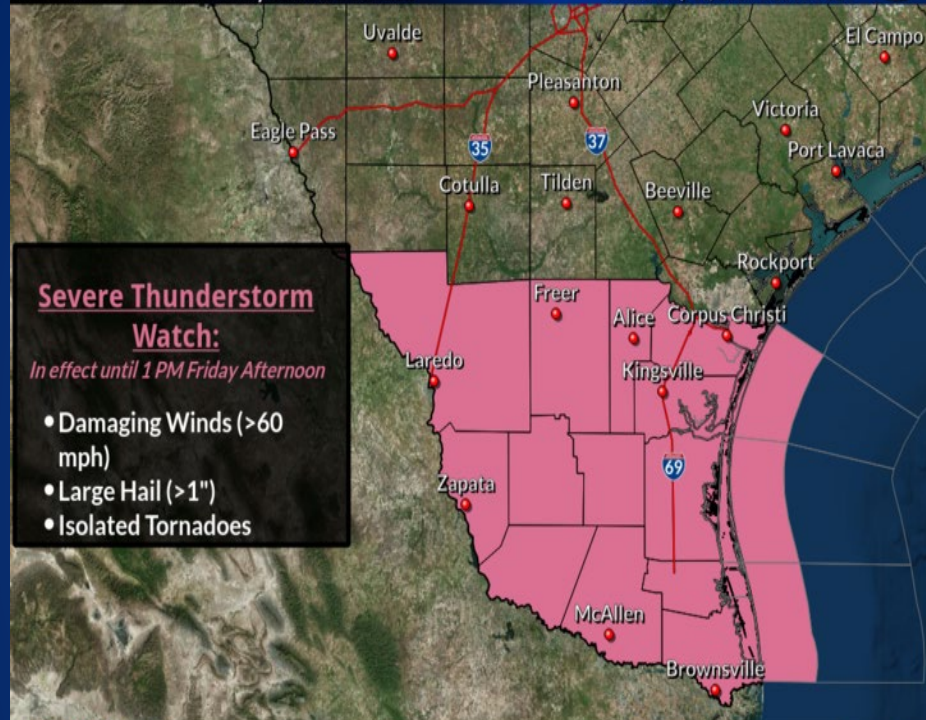

Severe Thunderstorm Watch

Weather Forecast Office
Corpus Christi, TX

Issued May 03, 2019 6:35 AM CDT

In Effect until 1 PM CST / Stay Alert & Informed

Severe Thunderstorm Watch:

In effect until 1 PM Friday Afternoon

- Damaging Winds (>60 mph)
- Large Hail (>1")
- Isolated Tornadoes

f t @NWSCorpus

weather.gov/crp

A Severe Thunderstorm Watch is in effect until 1 PM CST for the southern portions of the Brush Country and Coastal Bend and the coastal waters south of Port Aransas. Thunderstorms will be capable of producing damaging winds and large hail.

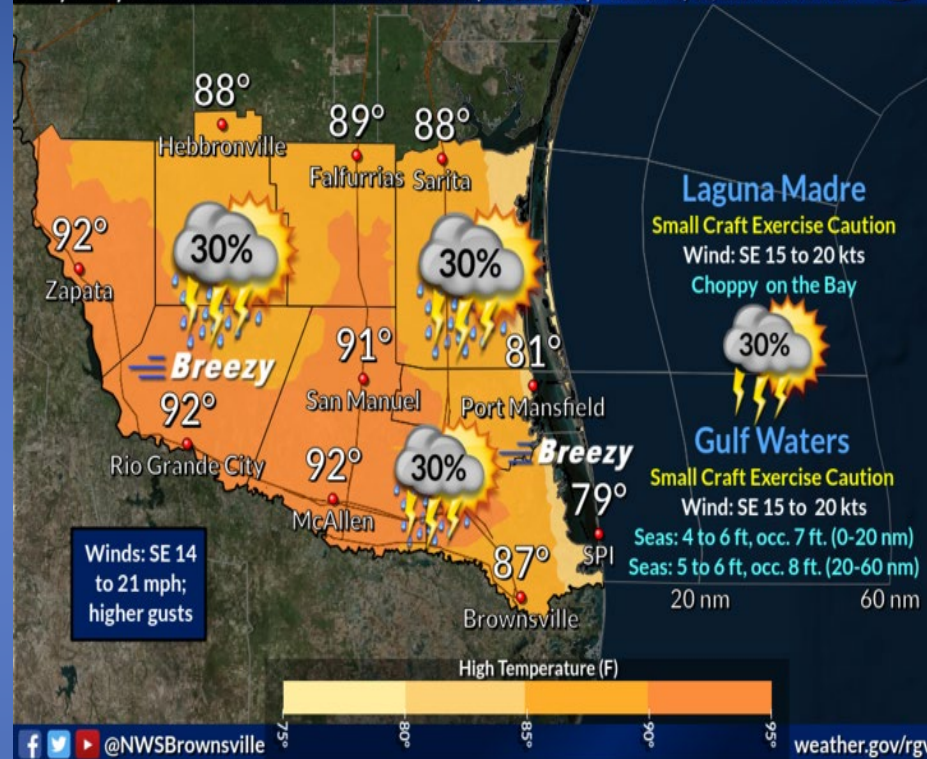

Remains Warm, Breezy, and Hazy

Weather Forecast Office
Brownsville/RGV, TX

Issued May 03, 2019 5:03 AM CDT

Partly Sunny w/ a Chance of Showers /Thunderstorms (Around 30%)

f t @NWSBrownsville

weather.gov/rgv

Rain and thunderstorm chances will increase today across Deep South Texas. Even still, today should be mainly dry (only about a 30% chance of showers/thunderstorms). However, if thunderstorms do form, they could pose a threat for large hail and damaging winds. Otherwise, should be another warm, breezy, and hazy day. Afternoon temperatures will be slightly cooler today than previous days, mainly due to cloud cover. Expect highs to be in the upper 80s to lower 90s across much of the area. Southeast winds are expected to remain breezy, sustained around 15 to 20 mph. Mariners operating small craft should exercise caution both on the bay and Gulf waters.

Weather Warning/Advisories Issued

DATE	WARNING TYPE	LOCATION
